**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

The following is a first action on the merits of application serial no. 10/501,804 filed July 20, 2004.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

### ***Specification***

The abstract of the disclosure is objected to because it contains more than 150 words. The abstract should contain 150 words or less. Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Becker et al. (6,6167,874). Becker et al. discloses A crankcase scavenged and lubricated four-stroke engine comprising: a cylinder;

a piston movably mounted in the cylinder in order crankshaft via a connecting rod; to rotatingly drive a the cylinder and the piston conjointly delimiting a combustion chamber; the cylinder having an intake opening and an intake valve (24) for opening and closing the intake opening; the cylinder having an exhaust opening and an exhaust valve for opening and closing the exhaust opening, followed by an exhaust duct; a mixture-preparation device (36) for supplying an air/fuel-lubricant mixture or for supplying in two steps an air/lubricant mixture and an air/fuel mixture; a crankcase (41) connected to the cylinder and delimiting together with the underside of the piston (22) a crankcase volume, to witch at least air and lubricant is supplied by the mixture preparation device (36); an intake channel (43) connecting to the crankcase or cylinder to supply at least air to the crankcase volume an overflow channel (47) connecting to the crankcase or cylinder and to the intake opening with intake valve to supply to the intake at least air and lubricant from the crankcase volume; a valve drive assembly driven by said crankshaft (20) for actuating the intake valve (24) and the exhaust valve , characterized in that it further comprises: a valve drive assembly housing (40) comprising one or more sections which is/are separate from the crankcase volume but in communication exclusively with the crankcase volume through at least one small size passage (42), and each section of the valve drive assembly housing has a lowest part

situated higher in the axial direction of the cylinder bore, i-e. closer to the combustion chamber, than the lowest part of the crankcase.

### **Communication**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Katrina B. Harris whose telephone number is 571-272-4842. The examiner can normally be reached on 6:30 AM -3:00 PM.
